Aluminium Boats

UNCOMPROMISING FINNISH HANDICRAFT - BUILT TO LAST

Faster aluminium boats are the result of ambitious product development by skillful Finnish designers and the boat building masters' passionate attitude towards boat manufacturing. Faster is no mass product - all our boats are made meticulously by hand.

The Faster boats are designed and manufactured at the Juha Snell Oy factory in Kellokoski, Finland. Distribution and marketing is handled by the family-owned company Oy Brandt Ab, based in Vantaa, Finland.

Juha Snell Oy is a family-owned company founded back in 1974. The first Faster aluminium boats were introduced to the public in 1978.

CAREFREE BOATING

With the quality materials and well thought details, Fasters are made for the users. All the boat models are hand-made in Finland out of untreated marine aluminum thicker than most boat manufacturers use, making Faster boats stronger and more durable than other aluminum boats. The premium boat maintains its value well for years.

Environmental issues are also important to Juha Snell Oy. That's why all the Faster boats are made out of recyclable materials

460 TH

THE COMPACT FISHERMAN'S FRIEND

Faster 460 TH is a durable and sturdy open-layout aluminum boat with a tiller-handle outboard engine. The boat has the same construction as its sister-model 460 i, making it a safe choice for e.g. recreational fishing and load transporting to and from the summer house. The Faster go-to feature, the unique quick-fix fastening rails for accessories, are present also in this Faster model and run along almost the entire insides of the boat. On these rails you can easily and quickly fasten additional accessories to make the 460 TH suited for the situation at hand. On the accessories list you can find e.g. different storage boxes, seats and load binding links. The boat comes with side railings as standard, and on the railings you have the possibility to mount e.g. fishing rod holders.

STANDARD EQUIPMENT

- ✓ Side railings HST
- ✓ Manual bilge pump
- ✓ Stern bench (seat/storage box)
- ✓ Navigation light
- ✓ Paddle
- ✓ Hook for trailer/locking
- ✓ Sensor frame

Moveable steering console

TAKES YOU WHERE YOU WANT TO GO, REGARDLESS OF THE TYPE OF SHORE

Alone, with a friend or the whole family – all the way, even to the rockiest of beaches. Faster 460 i is an aluminum boat for both the fisherman and the summer house boater, an effortless and easy maneuverable all-rounder for seas and lakes alike. In the 460 i model the steering console can be moved according to your needs, you can either have it as a side console on the starboard side or as a center console. This way it easily adapts to your own needs. Moving around in the boat is safe and effortless, and loading it is easy and carefree. Faster 460i comes standardly equipped with hydraulic steering, Trolling Control, a 12 V outlet and Honda Marine pre-rigging.

495 CX

THE ADAPTABLE SIDE CONSOLE BOAT

The popular 495 CX is a sturdy multitasker offers excellent driving properties and plenty of shelter from wind for four. One of its virtues is the console door, which has been placed in-between the wide side console and the port side freeboard – a solution some questioned at first, but further along found extremely well-working. The driver sits on the left side of the wide side console and thus in the middle of the boat, giving him/her the best control of the boat, even when the boat is driven solo. As the other Faster models, the 495 CX standard package also includes e.g. hydraulic steering, Trolling Control and a 7" Raymarine multi-function chartplotter with a CHIRP-sensor (if bought together with a Honda outboard). The comprehensive list of optional accessories allows the boat owner to easily adapt the boat to his/her own use.

STANDARD EQUIPMENT

- ✓ Raymarine Axiom 9"
- ✓ Hydraulic steering
- ✓ Trolling Control
- ✓ Side door
- ✓ Adjustable shell seats
- ✓ 118 cm wide storage/seating boxes
- ✓ Glove compartment in the console
- ✓ Integrated 65 liter fuel tank
- ✓ Fuel filter

495 CC

TAKES YOU WHERE YOU NEED, WHEN YOU NEED TO

Faster 495 CC is a center console boat that is suited for all weathers, effortless to maneuver. It is especially suited for sea transfers and leisure fishing, but as all Faster models it is easily transformed to your needs. The durable aluminum hull, without lifting strakes, makes smooth rides through the waves and the close to non-existent planning threshold makes the drive even and suave. The steering console in 495 CC is placed in the middle of the boat and the driver sits on a separate seat. The standard version of the boat has a 118 cm wide storage box, which is placed in the stern and fastened on the clever mounting rail which runs along the inner sides of the boat. On these rails you can easily add other storage boxes, fender holders etc.

Faster 495 CC, although its relatively small size, has the driving properties of a larger boat and a comprehensive standard equipment.

STANDARD EQUIPMENT

ENJOYABLE BOATING IN ALL CONDITIONS

Faster 525 SC is a durable dual console boat which seaworthiness and driving properties are truly exceptional and typically more like those of bigger sized boats. Topnotch comfort, equipping and transport capacity, all-in-one. Behind the two consoles, that are united by a sturdy middle door (standard equipment), up to five adults travel safely and sheltered from wind. The stern rope/anchor boxes placed on both sides of the engine well offer significant extra storage space. The other rope/anchor box is possible to detach, in which case an auxiliary engine can easily be installed in its place.

STANDARD EQUIPMENT

- ✓ Raymarine Axiom 9"
- ✓ Hydraulic steering
- ✓ Trolling Control
- ✓ Lockable storage units
- ✓ Adjustable shell seats
- ✓ Box for anchor and mooring lines in the stern
- ✓ 118 cm wide storage/seating boxes

GO OUT BOATING – WHENEVER, WHEREVER

Faster takes you safely to the destination as planned and on time. You can trust the 525 CC even when the weather conditions suddenly change or when the final destination is in a more challenging spot. This center console equipped aluminum boat makes sea journeys fun and comfortable and goods transporting effortless. The sizeable central steering console gives plenty of shelter for the driver and co-driver sitting behind the windshield, as well as sufficient shelter for the passengers on the stern bench. Moving around the boat is hassle-free due to the central console, and there is plenty of space to store away equipment and personal belongings.

BENEFITS OF A BOW RAMP WITHOUT COMPROMISING ON DRIVING PROPERTIES

Faster 545 SC is a versatile multitasker with a practical bow ramp and two side consoles. The 88 cm wide ramp makes it easy to load and unload sizeable and bulky equipment – you can even fit a cart-wheel or a two-wheeler on the bow deck. The ramp also facilitates embarking and debarking, even if the beach is rocky, shallow and uneven. The bow ramp is operated electronically via a switch on the console switch board. The 18° V-hull without lifting strakes ensures smooth running even in rough water. Thanks to the genial hull design the boat's driving properties are fully comparable to boats with a sharp bow – a top speed of approximately 34 knots is achieved even with a four-passenger load. The dual consoles together with a middle door offers shelter from wind for driver, co-driver and passengers sitting in the back. Faster 545 SC is suited for various needs – it's perfect not only as a versatile access boat for the summer home by the sea, but also as a boat for transporting e.g. divers and sizeable diving equipment, for fishing and leisure rides.

VERSATILITY AT ITS BEST

The practical bow ramp equipped multitasker Faster 545 CC is a substantial bow ramp equipped all-rounder that makes e.g. transportation of sizeable, bulky goods easy and hassle-free. The 88 cm wide bow ramp, which is easily operated via the switch on the console switch board, facilitates easy access and debarking on stony beaches. You can fit in a cartwheel, a two-wheeler or even certain types of mini ATVs onto the bow deck. Thanks to the genial hull design the driving properties of 545 CC stay true to the Faster brand, even though the bow shape is a tad different from normal sharp bows. The hull cuts waves beautifully and flows through the water smoothly and evenly, at the same time as driving it is extremely fun and addicting. The sizeable central steering console gives plenty of shelter to the driver and co-driver sitting behind the windshield, while maintaining easy access around the boat thanks to the walkaround-ability.

560 SC

TAKES YOU THROUGH STORMY WATERS

Faster 560 SC is the multi-purpose boat that takes you where you want to go, whenever you need to go. The outstanding hull design makes the boat extremely safe and comfortable to drive even if the sea is rough and the weather unexpectedly changes. Behind the dual console stands two boat chairs, and behind them is a wide bench formed by two separate seat/storage boxes. Between the two steering consoles a one-piece middle door has been installed, significantly improving the wind shelter in the cockpit. On either side of the engine well in the aft a large rope/anchor box has been fitted, of which the other is possible to detach in order for e.g. a small trolling engine to be attached. The boat has also been equipped with a canopy storage compartment in the aft, where the stern canopy can be folded away when not in use.

560 CC

ALWAYS READY WHEN AND WHERE YOU NEED TO GO

Faster 560 CC is made for boaters who need to go when a situation arises, may it be even under the worst weather conditions or in the dark of the winter. Due to the centrally placed steering console there is plenty of free space to move around the boat - even situations that require brisk actions are easy to handle onboard this robust multitasker. The seaworthiness and driving capabilities might easily give the impression of a boat a lot larger than this 5,6 m long aluminium boat - and of course the easy-adaptability is of the same high standard as the rest of the Faster fleet's. Most people use their Faster 560 CC for recreational fishing purposes, load transporting due to the great transport capacity or as an all-rounder at the summer home.

625 SC

A SPACIOUS AND VERSATILE LEISURE BOAT

Faster 625 SC is a real family boat with two consoles that have been redesigned for this specific model. The boat takes you even to rough shores despite the weather conditions. The hull design is extremely functional, meaning that the Faster 625 models glide through the water smoothly and well-balanced. The sharp bow cuts well through the waves and makes sure that the sea sprays are guided to the sides leaving passengers and baggage dry from splashes.

625 CC

MULTIFUNCTIONING ACCESS BOAT

Faster 625 CC is a sturdy multifunctioning boat for all weather conditions. The boat is made for demanding use and is easily transformable to your needs with wide range of accessories. Transporting goods and people with this model could not be easier, as the model has been registered for up to ten persons. Faster 625 CC is designed especially for active boaters who need a steady, spacious and smoothly running access or allround boat for various uses. The boat also works well in recreational fishing.

635 SC

MULTITASKER WITH A PRACTICAL BOW RAMP

The 635 SC, which has been equipped with a bow ramp and dual steering consoles, is a leisure boat that doubles as a sturdy workhorse. It is suited not only for transporting bulky and heavy loads, but also as an access boat between the summer house and harbor, as a boat for recreational fishing or even for diving purposes. The electrically operated, well over a meter wide bow ramp is the biggest asset of this model and facilitates not only packing and unpacking, but it also makes embarking and debarking the boat from the bow extremely effortless. The large bow deck even has space for a full-size ATV, which can easily be fastened in place thanks to durable load securing loops on the aluminum deck.

STANDARD EQUIPMENT

- ✓ Raymarine Axiom 9"
- ✓ Lockable storage units
- ✓ Trolling Control (if sold with Honda outboards BF40-BF150)
- ✓ Hydraulic steering

A TRUE COMBINATION OF UTILITY, PROFESSIONAL AND RECREATIONAL BOAT

Originally designed for professionals such as oil spill response and SAR workers, this sturdy and unwavering landing craft is a force to be reckoned with. Faster 635 CC originates as a work boat, which reinforces that the boat is extremely well built, unwavering and sturdy. The whole construction of the boat, the practical bow ramp and the spacious bow area create a variety of different usage purposes for the boat: The easy-attainable deck space is optimal for transporting sizeable loads, for fishing or even for transporting diving equipment - with the bow ramp opened, divers can easily slide into the water from the bow.
