

Press release 15.11.2019

FASTER'S NEW TRENDSETTERS 570 CC AND 570 SC

The pioneer of the open full aluminum boats, Juha Snell Oy from Kellokoski Finland launches two new Faster models 570 CC and 570 SC for the upcoming season 2020. The novelties will be presented at the Helsinki boat show Vene 20 Båt in February.

THROUGH STORMY WATERS

Faster's novelties 570 CC and 570 SC continue with the distinguished Faster quality, having new stylish looks and great driving characteristics. The boats are 5,7 meters long with total length of 6,15 meters. The multi-functioning boats are not only suited for transporting bulky and heavy loads, but also as an access boat between the summer house and harbor or as boats for recreational fishing. The driving characteristics are, as with all Fasters, solidly good; driving is stable even with high speed and the control of the boat stays precise. The carrying capacity of the 570 models is eight persons with up to 100 kg of packing.

The suitable engine power range is 80 to 115 horsepower. With a 115 hp engine the boat goes up to 38 knots. The driver's seats in both of the 570 models are designed to be ergonomic and user-friendly. All gauge, switches and chart plotter are located within reach and well in the driver's eyesight without blocking the visibility. The new console fits up to a 12" chart plotter.

NEW FRESH LOOK

Both 570 CC and 570 SC looks have been updated to this day. The whole design is refreshed, from the hull to consoles and colors. For example railings, seats, boxes, consoles and swimming platforms are all harmonic black.

High windscreen from real glass gives good shelter to everyone seated in the stern. Between the 570 SC's consoles is a one-part door improving the shield.

The color of the additional seat cushions can be chosen from two colors, black-grey or striped.

The boats have Faster's unique quick-fix rails on the sides that enable attaching seats, storage boxes etc. according to your needs.

FASTER QUALITY SINCE 1978

Faster aluminum boats are the result of ambitious product development by skillful Finnish designers and the boat building masters' passionate attitude towards boat manufacturing. Faster is no mass product - all our boats are made meticulously by hand.

The Faster boats are designed and manufactured at the Juha Snell Oy factory in Kellokoski, Finland. The family-owned company Oy Brandt Ab, based in Vantaa, Finland, handles distribution and marketing. Juha Snell Oy is a family-owned company founded back in 1974. The first Faster aluminum boats were introduced to the public in 1978.

570 CC 570 SC

TECHNICAL DETAILS

Length	5,74 m
Total length	6,15 m
Total width	2,20 m
Draught with full load	n. 0,80 m
Number of passengers	8 pers. / 600 kg
Additional weight	100 kg
Weight	620 kg
Fuel tank	140 l
Maximum recommended engine	85 kW (115 hp)
Top speed	38 knots
Electrics	12 V DC

The production version will differ partially from the model shown on the pictures.
Due to continues product development Faster withholds the right to changes without prior notice.

STANDARD EQUIPMENT

- ✓ Raymarine Axiom 9 RV + CHIRP CPT-100DVS sonar transducer
- ✓ Lockable storage units
- ✓ Trolling Control
- ✓ Hydraulic steering
- ✓ Manual bilge pump
- ✓ Black side grab rails HST
- ✓ Navigation lights
- ✓ Paddle
- ✓ Integrated 140 liter fuel tank
- ✓ Fuel filter
- ✓ Hook for trailer/locking
- ✓ Transducer bracket, adjustable
- ✓ Swimming ladder
- ✓ 12 V outlet
- ✓ Fire extinguisher
- ✓ Adjustable shell seats
- ✓ Box for anchor and mooring lines in the stern
- ✓ Side door (SC model)
- ✓ Canopy storage
- ✓ Glove compartment in the console
- ✓ 2 x 78 cm wide storage/seating boxes
